## Emerald Ash Borer Workshop Scheduled for June 18

**Warren, Pa.** (May 26, 2015) – The Allegheny National Forest and the National Wild Turkey Federation are hosting an informational workshop about the emerald ash borer. The workshop will be held on June 18, 2015 from 5:30 p.m. to 8:30 p.m. at the Allegheny National Forest Supervisor's Office, 4 Farm Colony Dr., Warren, Pennsylvania.

Emerald ash borer is an exotic, wood boring beetle native to Asia that attacks all species of North American ash trees. It has killed an estimated 50 million ash trees in the United States and Canada since 2002. "This workshop is designed to help area landowners learn about this invasive pest that is devastating all North American ash species, and has established infestations across much of the ANF region," said Andrea Hille, Forest Silviculturist.

Several EAB experts will present information on a broad range of topics regarding EAB, including:

- Emerald ash borer biology, history introduction and spread (Dr. Houping Liu, Entomologist, PA DCNR)
- Pennsylvania Ash Management Plan (Dr. Donald Eggen, PA DCNR)
- Long-term ash conservation/seed collection protocols (Robert Karrfalt, USFS National Seed Laboratory)
- EAB impacts on forests; survivor ash; resistance breeding program; and recommendations for landowners (Dr. Charlie Flower, University of Illinois at Chicago)

For more information about this workshop, please contact:

- Kristen Giger, National Wild Turkey Federation at: [kgiger@nwtf.net](mailto:kgiger@nwtf.net)
- Andrea Hille, Allegheny National Forest at: [ahille@fs.fed.us](mailto:ahille@fs.fed.us)

The Allegheny National Forest is also planning two projects regarding the study and treatment of the emerald ash borer. Information about these projects can be found at: <http://www.fs.usda.gov/projects/allegheny/landmanagement/projects>

The U.S. Forest Service is an agency of the U.S. Department of Agriculture, with a mission of sustaining the health, diversity and productivity of the nation's forests and grasslands to meet the needs of present and future generations. The Forest Service's Eastern Region has 17 national forests and one national tallgrass prairie located throughout 20 Midwestern and Eastern states. We're spread from Maine to Minnesota and from Maryland to Missouri. For more information, visit [www.fs.usda.gov/R9](http://www.fs.usda.gov/R9).

The U.S. Forest Service manages 193 million acres of public land, provides assistance to state and private landowners, and maintains the largest forestry research organization in the world. The public lands that the Forest Service manages, contribute more than \$13 billion to the economy each year through visitor spending alone. Those same lands provide 20 percent of the nation's clean water supply, a value estimated at \$7.2 billion per year. The agency has either a direct or indirect role in stewardship of about 80 percent of the 850 million forested acres within the U.S. and includes 100 million acres that are urban forests where most Americans live. For more information, visit [www.fs.usda.gov/](http://www.fs.usda.gov/).
